

Getting started with ScienceDirect

Advancing human progress together

Enabling efficient research for 21 years and counting, Elsevier's ScienceDirect lets you explore wide-ranging subjects in:

From basic science to current developments to novel research, researchers worldwide are downloading two million PDFs of relevant content each day from ScienceDirect.

A ScienceDirect subscription gives you access to 23 million full-text articles from over 3,000 journals and more than 48,000 book titles. With more than 3.8 million open-access articles at your fingertips, the next big step towards discovery is up to you!

Let's get you started...

The benefits of your Elsevier account

With an [Elsevier account](#), you unlock features specifically designed to support your research goals.

Having an account enables you to:

- Set up alerts for searches, journals and book series
- Receive recommendations personalized to your reading history
- Access and manage your reading and search history
- Review the [privacy options](#) for your account

Search

Now that you're on [ScienceDirect](#), with your account, it's time to look around.

The ScienceDirect search functionality offers a multitude of search fields, filters and alerts to focus your search and improve your workflow.

First, choose the search technique you prefer.

If you want a broad search that you can filter afterwards, head to the [search bar](#) for a quick search:

A screenshot of the ScienceDirect search interface. At the top, there is a navigation bar with the ScienceDirect logo, a plus icon for ScienceDirect AI, a link to Journals & Books, a help icon, and user information for Manish Uniyal. Below the navigation bar, a search prompt reads "Search for peer-reviewed journal articles and book chapters (including open access content)". There are three input fields: "Find articles with these terms", "In this journal or book title", and "Author(s)". A blue "Search" button is to the right of the input fields, followed by a link to "Advanced search".

ScienceDirect AI Journals & Books Help Manish Uniyal Elsevier - Demonstrat...

Search for peer-reviewed journal articles and book chapters (including open access content)

Find articles with these terms In this journal or book title Author(s)

Search Advanced search

Enter keywords, an author name, or the title of a journal or book to get started.

Search

You might want to begin with a narrow search instead, so click on [Advanced Search](#) where you'll see how easy it is to get specific. Your previous searches will be conveniently saved for you at the bottom of the page.

On the Search results page, you can:

- Filter for open access/open archives articles
- Check out suggested publications
- Set search alerts
- Download search alerts list as a .CSV

View of filter tabs part of Advanced Search

The screenshot displays the ScienceDirect Advanced Search page. At the top left is the ScienceDirect logo, and at the top right is the text "Journals & Books". Below the logo is the title "Advanced Search". A "Search tips" link with an information icon is on the left. The main search area contains a large text box labeled "Find articles with these terms". Below this are several filter tabs: "In this journal or book title", "Year(s)", "Author(s)", "Author affiliation", "Volume(s)", "Issue(s)", and "Page(s)". Each tab has a corresponding input field. A "Show all fields" link with a downward arrow is located below the filter tabs. A blue "Search" button with a magnifying glass icon is on the right. At the bottom, there is a "Recent searches" link with an information icon, and a search history entry: "Journal or book title: Endeavour".

Easy to evaluate journal homepages

When your research takes you to the homepage of a journal, all information about that journal is easily accessible.

You spend less time trying to find the right information and more time using what you find in your workflow.

- Improved navigation allows you to discover relevant content faster
- Access indicators help identify available content, including open access
- Easy links to submit your article or find the Guide for author

Clear identity via book homepages

When you access books on ScienceDirect, you'll see right away that you're consulting a trusted, high-quality source.

The book homepages include:

- Detailed book information
- Intuitive ways to navigate and interact with content
- One-second load times

Plus, go ahead and browse books on multiple devices wherever you are.

ScienceDirect Topics expand your knowledge with foundational content

[ScienceDirect Topics](#) have become a popular feature for researchers and students looking to broaden their understanding of scholarly and technical terms. Topics are especially useful for onboarding in interdisciplinary research or just to learn or better understand a new concept.

Topics reveal succinct, selected contextual information from reference books, valuable content when and where you needed it in your natural research workflow. You can access Topics via ScienceDirect and also through search engines such as Google.

When working in ScienceDirect, simply hover over a highlighted word in the article you're reading. Via hyperlink, you can immediately go to a page with authoritative and foundational content for that term.

View of filter tabs part of Advanced Search

1. Introduction

Problematic internet use (PIU) is a fundamental contributor to prolonged screen-time, elevating the odds of mental and socioemotional difficulties among teenagers (Oswald et al., 2020), and associated with a wide spectrum of risky online activities, encompassing but not limited to cyberbullying, internet pornography, and internet fraud (Chao et al., 2020), of which cyberbullying is in the focus of the present study. The prevalence

Bullying

Cyberbullying
Cyberbullying is a relatively new medium through which bullying occurs (e.g., chat rooms, text messages). Cyberbullying has been defined as an individual or a group willfully using information and communication involving electronic technologies to facilitate deliberate and repeated harassment or threat to another individual or group by sending or posting cruel text and/or graphics using technological means. Many of the methods used in traditional bullying are used in cyberbullying. Direct cyberbullying can occur when one person calls another a

ScienceDirect Topics expand your knowledge with foundational content

If you're using Google or another search engine to get more information about a term, just enter the term and ScienceDirect, and it comes up. With enhanced taxonomy across all 20 Topic domains, Topic pages are available for many disciplines including:

- Computer Science
- Engineering
- Mathematics
- Physics and Astronomy
- Economics, Econometrics and Finance
- Food Science
- Materials Science and Materials Engineering
- Earth and Environmental Sciences
- Psychology
- Social Sciences

Stay signed in to get personalized recommendations

You can prevent information overload by staying signed in while you browse and search in ScienceDirect. Personalized recommendations will make your research more effective. The more you interact with ScienceDirect while signed in, the more precise and relevant the recommendations become.

Let us help you direct the right content to you when and where you need it during your research process. We'll use machine learning and your online activity to suggest content tailored specifically to your needs.

On the homepage, click on your name and then '[Recommendations](#)' to see what our adaptive algorithm has found for you.

My recommendations offers you a complete list of recommended research content each week, delivered to you via email.

Schedule alerts about new relevant research

Unlike Recommendations, Alerts let you know about only new research that meets your criteria.

Once you've either searched in ScienceDirect or browsed publications, you can choose to sign up for alerts. Go to 'Manage alerts', then click on either 'Journal & Book series', 'Search' or both. You can select a publication or carry out a search to set the alerts you want.

Easier tracking of your reading and search history

When signed in, your Search and Reading history helps you keep track of your activities.

The 100 most recent articles you have viewed will be saved in your reading history.

You can then review, save and delete items from your ScienceDirect Reading or Search history or download the full list of entries.

Use the toggle at the top of the screen to easily switch on and off your history.

Users can manage their reading history and customize settings

Quickly export your book chapters from ScienceDirect into Mendeley

Many of you also use [Mendeley](#), our free reference manager and an academic social network, seamlessly embedded in ScienceDirect. Knowing that importing PDFs and references from the web is an important part of many researchers' workflow, you can directly export articles from ScienceDirect into your Mendeley library

Once you've been authenticated on ScienceDirect, the Mendeley Importer will recognize that you have the right to access full-text PDFs and you can **add to Mendeley** with just one click.

Share articles with your colleagues with just a click

Social Sharing allows you to easily share articles right from ScienceDirect via your Facebook, LinkedIn, Twitter, Reddit, or email account.

Just click on the appropriate icon and post what you wish to share. This will allow you to receive feedback on findings and publications more quickly from your collaborators, peers and students, increasing your efficiency during already busy workdays.

Access ScienceDirect remotely, whenever you want

You can access ScienceDirect anytime and anywhere. On your laptop or tablet, at home or on the road, on campus or off, you can keep your research going by accessing ScienceDirect remotely:

- Visit our [Institutional access page](#) and enter your institutional email address of the name of your organization.
- Once your institution is identified, you can sign in with your institutional credentials.
- We'll send you an email where you'll click on the 'Activate my remote access now' link
- You're ready to use ScienceDirect remotely

A research experience accessible to all

We optimize the ScienceDirect experience for everyone, including people with impairments such as auditory, cognitive, physical, speech or visual.

Our goal is to meet level A and AA guidelines established by the W3C's Web Content Accessibility Guidelines 2.1 and the U.S. Section 508 Standards of the Federal Rehabilitation Act, as well as similar standards enacted by countries around the globe.

Here are some features that enhance the accessibility of ScienceDirect:

- HTML journal articles and book chapters are compatible with screen readers such as JAWS, NVDA and Apple's VoiceOver
- Pages are well structured using headings, landmarks and lists so users of assistive technology can easily jump around pages
- Math content is available in MathML, which can be spoken by text-to-speech engines or converted to Braille and pasted into math equation editors or Microsoft Office documents
- Pages employ ARIA (Accessibility for Rich Internet Applications) to enhance navigation, orientation and labeling for users of screen readers and other assistive technology
- Videos are played in a fully accessible media player (AblePlayer)
- For more information on ScienceDirect accessibility, or for accessibility related feedback and support, please refer to our [accessibility statement](#)

Security is important to you and us

We have obtained ISO 27001 and ISO 27701 certification to further demonstrate credibility and establish trust with our customers.

We're proud that this designation validates that ScienceDirect adheres to global standards of quality assurance. We're more proactive than ever in preventing security breaches – and taking quick action if any occur.

Monitoring and communication are fundamental in keeping your interaction with ScienceDirect as secure as possible:

- We monitor on a 24/7 basis and block the session IP if we detect abnormal behavior
- We get in touch with you and ask you to investigate the particular IP
- If solved, we unblock the IP

ScienceDirect is also available via HTTPS

Seek help when you need it

Our [ScienceDirect Support Center](#) can answer your frequently asked questions and offers video tutorials and other user guides.

You can access the ScienceDirect Support Center by clicking the Help button in the upper right corner of the ScienceDirect pages or by following the link above.

Now also available in Chinese and Japanese!

Click the question mark button to link to the Support Center
